Title Reconfigure IDL Software Licenses on FLEXLM Servers

Documents Affected	Source Nos (RID, NCR, Action Item, GSFC CCR, etc.) or Tech Reference
N/A	N/A

RTM Change ☐   **Start New Baseline** ☐

Problem

IDL software licenses are currently configured on Sun and SGI servers. Licenses were initially installed on Science Processors with the thought that IDL licenses could not be generated on an SGI via a Sun server. Due to a multiplatform daemon, licenses for the software can now be accessed across platforms. The current configuration utilizes licenses which are not needed.

Need Date ? May 28, 1998

Proposed Solution

Reconfigure the software licenses according to baseline standards, on the CSS as primary server and MSS as backup servers. Remove the licenses from the Science processors. IDL licenses are to be installed on these existing machines, with a right to use of five per site.
